

FOR IMMEDIATE RELEASE

Clayton Richter, Foundation Homes, EARNS CERTIFIED GREEN PROFESSIONAL EDUCATIONAL DESIGNATION

Houston, November 22, 2011– Clayton Richter, of **Foundation Homes** is now one of the select group of professionals nationwide to earn the Certified Green Professional (CGP) educational designation, identifying **him** as a **custom builder** with the skills and the best strategies for incorporating green building principles into new home and remodeling projects.

Foundation Homes builds custom homes in the Houston, Cypress, Katy, and Tomball areas. They also offer remodeling services, design-builds, outdoor kitchen and living areas, consulting services, and a build-on-your lot home building program.

The CGP curriculum includes three days of training from leading building industry practitioners and academics on a range of topics, including strategies for integrating green building principles into homes using cost-effective methods of construction.

Coursework is based on the National Green Building Standard, the only ANSI-approved rating system for green homes, developments and remodeling projects. The standard includes sections on energy, water and resource efficiency; indoor environmental quality; lot and site development; and home owner education.

Administered by the National Association of Home Builders, the CGP program is sponsored locally by **The Greater Houston Homebuilders Association.**

“I look forward to helping home owners and home buyers in **Houston** create green, sustainable homes built to save resources as well as utility costs,” said **Clayton.**
